FRANCIS MADAMA

SOFTWARE DEVELOPER
& DevOps Practitioner

WORK EXPERIENCE

PROFESSIONAL SUMMARY

Result-oriented Software Engineer and DevOps Practitioner with a strong foundation in building high-performance web applications and optimizing deployment pipelines. Expert in core web architectures utilizing **HTML5, CSS3, JavaScript, PHP, and MySQL**, with specialized experience in structural database normalization and secure coding execution loops. Actively expanding capabilities in cross-platform mobile development and scalable restful microservices utilizing **Flutter, Dart, and Python**. Driven by the philosophy of continuous integration, clean architecture, and bulletproof system automation.

TECHNICAL SKILLS

- **Core Engineering Stack:** PHP (OOP & Procedural), JavaScript, MySQL, HTML5, CSS3.
- **Emerging Technologies (In Progress):** Flutter Ecosystem, Dart Programming, Python Frameworks.
- **Web Development & WebApps:** E-commerce Architecture, Custom CMS Engineering, API Ingestion, Dynamic Data Filtering, Responsive Interface Design (Media Queries, Flexbox).
- **DevOps & Infrastructure Practice:** Localhost Server Virtualization (XAMPP Framework), Git & GitHub Version Control, Automated Security Filtering, cPanel Deployment Architecture, Server-Side Systems Migration Controls.
- **Architectural Competencies:** Object-Oriented Programming (OOP), Data Structures & Algorithms, Data Serialization & Parsing (JSON Processing), SQL Injection Prevention, Regular Expressions (Regex Code Trimming).

PROJECT & WORK EXPERIENCE

Facti Shop E-Commerce Platform: Engineered a full-stack e-commerce web application utilizing **PHP and MySQL** on the backend to manage user accounts, log product inventories, and process transaction histories, combined with **HTML, CSS, and JavaScript** on the frontend to deliver a fully responsive product catalog viewport. The system features a centralized secure Admin Dashboard that orchestrates end-to-end sales transactions auditing, automated financial accounting calculations, and localized marketing operations loops, including an integrated high-speed **Bulk SMS** API framework designed to broadcast cross-channel digital promotional alerts directly to registered customer data matrices

Nafaslink Real Estate Platform: Engineered a full-stack property marketplace and directory web application utilizing **PHP and MySQL** for secure relational backend data management and **HTML, CSS, and JavaScript** for frontend user interface responsiveness. The system features dedicated, tiered user registration gateways (Free, Bronze, Silver, Gold bundles) integrated with dynamic client-side checkbox validation algorithms to enforce regulatory privacy policy compliance prior to database state mutations. Additionally, the architecture incorporates a centralized financial accounting module that reads uploaded CSV ledger data, cleans raw text inputs via automated string transformation scripts, and computes real-time aggregates for revenue and net profit tracking across active broker profiles.
